Re: **Steelmaking with ferrous scrap**

Dear sir or madam,

Hyundai Steel Company is confirming that its steel making plants utilizes the Electric Arc Furnaces to recycled ferrous (iron based) scrap metal for producing Bars and Shapes(Sections).

The total post-consumer content of recycled ferrous scarp is of 95%.

The total pre-consumer (post industry) content of recycled ferrous scrap is 5%.

Please find attached herewith.

Appreciate for your kind understanding and cooperation.

Yours faithfully,

T. Y. Jee
General Manager of Quality Assurance Team
